

EUSR National Water Hygiene (Blue Card)

Course Aim

To provide delegates with an understanding of the vital part they play in maintaining clean and safe drinking water and protecting public health.

This course is delivered on behalf of HSS Training by one of our trusted third-party suppliers, who are a registered EUSR-approved provider.

Who Should Attend?

Anyone entering clean water sites or working on the clean water network as part of Restricted Operations, including work at treatment works, reservoirs, pumping stations, wells, boreholes, water mains and service pipes.

Pre-course health screening is required before training and assessment.

Certification

Upon successful completion of this course, delegates will be issued with a National Water Hygiene EUSR photo ID card – which because of its blue colour, it's also known as the 'Blue Card'.

Agenda

- **Module 1:** The importance of water
Understanding the importance of wholesome water, the scarcity of clean water and the role that water plays in maintaining a healthy and functioning society.

Module 2: Water as a carrier of disease
Understanding how water can be a carrier of disease, waterborne disease, illnesses contracted through contaminated water and diseases that still prove challenging today.

Module 3: Potential contamination and its consequences
Exploring potential sources of water contamination across all areas of the UK water industry and the consequences should contamination occur.

Module 4: Preventing contamination
Exploring the steps that an individual can take to prevent contamination of the clean water supply and safeguard water quality.
